**PROFILE**

As a Higher Diploma of Infrastructure and Networking program student from Auston University who is really passionate about web development(Frontend Developer). Responsive with some programming languages such as HTML, CSS, JavaScript, and some other fundamental programming languages such as C, C++, and Java. The fundamentals of computer systems, Network security, IT Security Management, Cisco Routing and Switching, Project Management, Networking Essentials, and Troubleshooting are additional ways to learn and gain knowledge about IT topics. Became more proficient in web development after gaining additional experience from the Higher Diploma term's final project. Possess a personality, can do excellent work, and communicate with teammates as well. Want to challenge more knowledge and develop from the IT internship program, and gain practical experience in the IT-related field.
